

**Experience
a well thought out
service delivered to
your home.**

WHAT WE OFFER

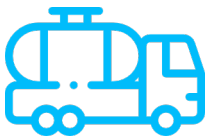

Easy Booking

Sign up with minimum details in our app/website, pay online and schedule your delivery.

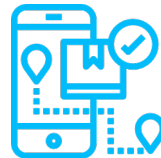

Perfect Pricing

Transparent billing, competitive rates, no excess billing and no hidden charges.

Prompt Delivery

Tankme will allocate a delivery partner and update the order details on the app/website. Based on the availability the deliveries are typically fulfilled between 1 to 24 hours.

Tracking Order

Delivery location is shared with the delivery partner to allow GPS navigation and the customer will be provided tracking details in real-time.

Automatic Reroutes

In the event that your delivery partner is unable to fulfil your order, Tankme will automatically re-route another delivery partners to ensure onetime delivery.

WHO WE ARE

On-demand 24/7 water delivery service.

Tankme was designed to ensure seamless service and integration, to connect private water suppliers in the city with households and businesses that absolutely require water on a daily basis.

We operate on a first come, first served basis fulfilling orders in the order they are received. Tankme is able to locate and service customers and tankers 24/7 while ensuring transparency in the process.

Tankme was created using top-of-the-line tech infrastructure in order to provide a seamless experience from ordering to delivery. Tankme however, promises much more – our back end systems are also built to maintain and manage the water supply itself, to protect our resources and maintain quality.

Tankme also considers your privacy and safety a priority and we promise to ensure a robust and well-designed service.

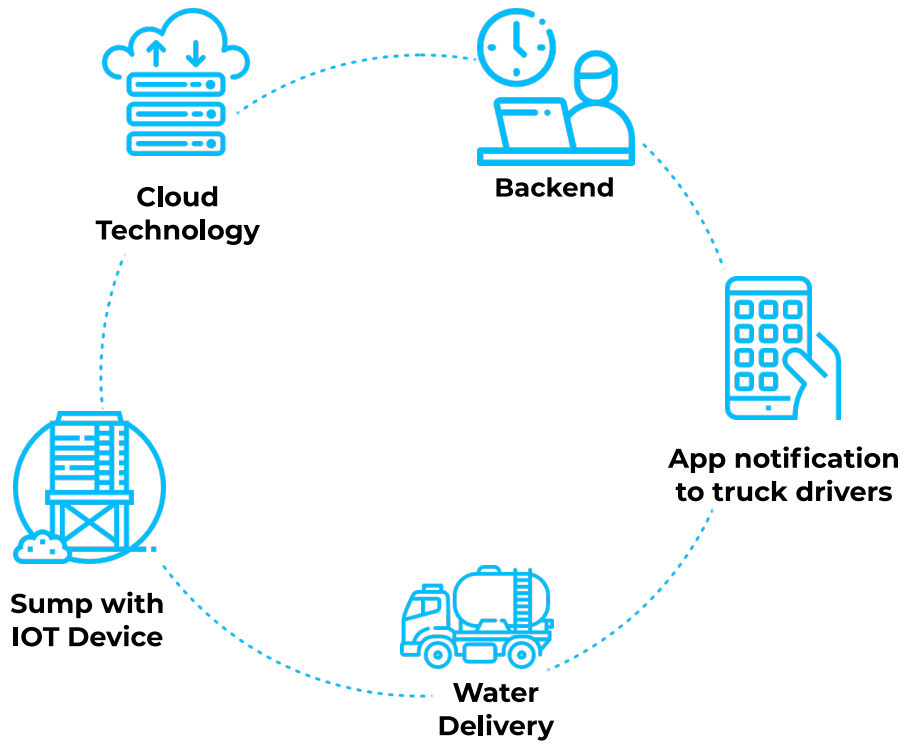

OUR TEAM

Our team is comprised of young and experienced professionals from various sectors – from entrepreneurs, business investors, technological mavericks, logistics, distribution as well as marketing. Our mission in putting this team together was to include various perspectives and expertise in a range of diverse fields into a well-thought-out end to end solution.

Our hope is that we are able to make life, just a little bit easier!
